Light and Power bucket, where my
boys were waiting with all the car
windows open, (and I was hurry-
ing)! Now the City and Council
officials were standing well back
and away from this poisoning. I'm
sure it was quite a sight.

I called the County health man
the next day to find out what kind
of poison was used, because I had
become quite ill from my exposure
for a brief period of time. He
guessed it was cyanide, but told me
the name of the company that I
could call if I wished to find out for
sure. No help here.

I called the exterminator who
told me the name of the company and
that he would send me infor-
mation in the next day.
